Weekly Health Report

6

OFFICE OF MILITARY GOVERNMENT FOR GERMANY (US)
INTERNAL AFFAIRS AND COMMUNICATIONS DIVISION
PUBLIC HEALTH AND WELFARE BRANCH

Occupied Germany:

In the following Appendices "A", "B", and "C" are summaries of cases and rates by Regierungsbezirk and Land, and case rates by Regierungsbezirk and Land for the week ended 4 January 1947.

Communicable Diseases:

Following a very decided drop in the reported cases of diphtheria, scarlet fever, tuberculosis, whooping cough, gonorrhea, syphilis, and scabies due to failure of German public health offices to report during the Christmas holiday, the incidence of all these disease has increased during the current week but is still slightly below the level of the pre-holiday reports. No particular significance can be attributed to the increases of this week.

APPENDIX "A"

Communicable Disease Report United States Zone of Germany for Week ending 4 January 1947

Regierungs- bezirk	Popu- lation	Reported Number of New CASES and DEATHS of COMMUNICABLE DISEASE														c: Cases d: Deaths
